**Note:** for different pumps, tubing and/or bottle sizes, please contact your sales representative at Zematra to discuss the possibilities.

product #: 1001033

SPECS

## Vampire Sampling Equipment

Vampire pumps have brought a new level of performance to fluid sampling. Their durability, simplicity, versatility and ease of operation give a distinct advantage over competitive models.

Companies such as environmental clean-up, trucking, mass transit systems, laboratories etc. have all found the Vampire pumps to be invaluable.

With the Vampire pumps the sample liquid comes into contact with the suction tube and the sample bottle only, keeping the pump perfectly clean.
